

PCI 1-2-3SM

Take the simpler path to PCI compliance.

The thought of losing or compromising a valued customer's personal information is a critical concern for retailers and other merchants. It makes shoppers reluctant to buy, which costs retailers business. The Payment Card Industry (PCI) Security Standards Council (an organization formed by the card brands) created the PCI Data Security Standard (DSS) to help merchants proactively protect customer account data.

As a merchant or service provider that stores, processes or transmits customer account data, you must comply with the PCI DSS controls and processes. If you don't, you risk costly fines, audit costs, restrictions or worse should a breach occur.

Achieving PCI compliance can be as easy as 1-2-3.

ControlScan provides a comprehensive set of tools to help simplify PCI compliance. But the reality is that compliance is not simple. That's why ControlScan also offers unlimited, high touch support, providing you with access to one-on-one consultation with knowledgeable support analysts who are willing to stay with you on the phone through the entire process, helping you answer every question.

PCI 1-2-3 will expertly guide your business through each of the PCI DSS requirements.

The ControlScan PCI 1-2-3SM compliance solution is powered by our advanced online platform, SecureEdgeTM. This solution provides you with the leading tools and support necessary to analyze, remediate and validate PCI compliance at an affordable rate, including:

1. SmartSAQ

- + An intuitive user interface with simplified SAQ questions
- + Easy-to-understand help text with pictures that clearly illustrate and explain key concepts
- + The ability to complete all or any part of the SAQ and apply responses to affiliate businesses
- + A faster SAQ completion and revalidation process, saving time and eliminating frustration

2. SmartScan

- + External vulnerability scans that check for cross-site scripting, SQL injection, remote file inclusion and many other website, application and network-based vulnerabilities
- + Scan reports that meet the Approved Scanning Vendor (ASV) Program Guide requirements
- + Vulnerabilities prioritized by severity
- + Detailed instructions for correcting identified problems

3. PCI 1-2-3 Policy Builder

- + A set of custom security policy templates that are automatically generated based on the way you process payment cards, making it easy for you to comply with the specific PCI DSS requirement

4. PCI 1-2-3 Security Awareness Training

- + On-demand security training designed specifically for small businesses (1-5 employees), delivered in a non-technical, easy-to-consume manner
- + Customized security awareness training options are also available for mid-size businesses

5. Data Breach Protection

- + Coverage for expenses a merchant is contractually obligated to pay as a result of a breach incident
